

**Fake News week**  
**Jeanne Antide High School**  
**High Savoy, France**  
**February 1-4, 2022**

**Evaluation / Feedback of the week :**

- **Did we enjoy the week ? Why ?**

The teachers appreciate the week, because it was possible for the students to work by group. They could use their capacities about video making, scripts writing and acting.

In second time, they enjoy the very clear and good conference by Doctor Butter, which explains clearly what were Fake News and Conspiracy Theories. It was a good beginning for this week. It was an perfect basis to construct the video's projects.

We thanks the team which prepare all of the documents about « Research Material » and « Film project ». It was precious.

The pupils appreciate because :

- It allowed to meet new people and discover new things.
- It was funny to speak english and to make videos.
- It changes of classical courses.
- It's brought each other closer.
- Someone discover what is an european project.
- They improved their english and learned new words / vocabulary.

- They enjoy to speak with other students. But it was quite short.

- What did you prefer in the activities ?

The teachers concludes that Thursday was rich. This was the moment where students could applicate their knowledges about Fake News and conspiracy theories. Our students used what they learned in their Informatic courses and we were very impressed by their facilities during the making of.

We appreciate the repartition between Visio and activities in group. It was easier to follow the week with different activities. All of the students appreciate to make their own stories and videos. It was a creative and funny activity. We regret that there was not enough time for sharing between the europeans.

- What was difficult for you ?

It was difficult to communicate through Zoom, because of Internet disturbing (sound, line...). We met some comprehension problems, and realize how it is precious to meet other countries, other langages, other cultures.

- What did you learn from the project ?

Every year, we learn more and more about Fake news, with different points of view. The students estime that it is sometimes difficult to differenciate Fake news from conspiracy theories. Consequently, they like the explanations.

We learnt about video making, leading a video project (script, production, post-production). It was great to challenging. It was possible for us to experiment group's working and improve our english.

- Would you participate to another Erasmus project ?

We will appreciate to conduct an another project through a participation, during an European trip. It was so sad that we couldn't come in Germany. But the result is good. So the next time, face to face will be huge.
